
Site no.: B6

Site name: Cairn Broadlands

Grid reference: [NO 27194 76976]

Locality: Upper Glen Clova

GCR Status: N/A

GCR No.: N/A

Type: Natural landform and natural exposures

Description: A large, impressive, well-exposed landslip formed across the contact of the Glen Doll Dioritic Pluton and its country rocks, including the thermal aureole of the pluton.

Justification: The site combines an excellent example of a dynamic landform (landslip) with good exposures of contrasting bedrock types and their relationships.
