## Site no.: Q1

**Site name:** Loch an Duin Breach

**Grid reference:** [NN 72414 80417]

**Locality:** Loch an Duin and adjacent An Dun, Gaick Forest

**GCR Status:** N/A

**GCR No.:** N/A

**Type:** Landform assemblage

**Description:** The glen occupied by Loch an Duin is a major glacial breach through the main east-west watershed of the Grampian Highlands, whereas the slopes of the mountain to the west, An Dun, have been affected by many Rock Slope Failures

**Justification:** The Loch an Duin Breach is a good example of a glacial breach and it, together with related features, are important in the study of long-term landscape evolution of the Grampian Highlands. An Dun and surrounding hills boast excellent examples of rock slope failures and tension cracks.
