## Site no.: Q4

**Site name:** Edendon Alluvial Fan

**Grid reference:** [NN 71562 76968]

**Locality:** A dissected alluvial fan 1.3 km south of Sronphadruig Lodge in the valley of the Edendon Water

**GCR Status:** N/A

**GCR No.:** N/A

**Type:** Natural section and landform

**Description:** An uncommon section through the toe of an alluvial fan exposing several units separated by palaeosols that have been radiocarbon-dated

**Justification:** Important site for research into the rates of accumulation, timing and causes of fan-building events during the Holocene.
