
Key geological sites in Wales

Data downloaded from DataMapWales and used under the Open Government Licence for Public Sector Information (OGL)

This list of geosites is based on an export of the Welsh Regionally Important Geodiversity Sites (RIGS) database, created in September 2024. The list does not necessarily represent the most recent version of the RIGS database, and conclusions regarding any site's legal or planning status should not be drawn from its inclusion in this list.

For the official list of Welsh RIGS, visit DataMapWales: https://datamap.gov.wales/layers/inspire-nrw:NRW_RIG_SITES

Listing is by region, local authority area and then by site name.

The geosite areas are:

- Central Wales
- Gwynedd & Môn
- NEWRIGS — North East Wales RIGS
- SEWRIGS — South East Wales RIGS Group
- South West Wales
