## British Geological Survey photographs

The following are links to the full set of images that were taken by the Survey at the time of mapping.

Link	Caption	Description	Photographer	Grid reference
<a href="#">A01193</a>	SE side of Dinas Trefriw. Looking NE.	SE side of Dinas Trefriw. Looking NE. Cataclastic schist. Torn lenticles of grit in chloritic phyllite.	Rhodes, J.	[SH 365 655]
<a href="#">A01194</a>	Gorge, Dinas Trefriw. Looking W.	Gorge, Dinas Trefriw. Looking W. Cataclastic schist. Torn lenticles of grit in chloritic phyllite. Dinas Trefriw, (W. side). Looking NW.	Rhodes, J.	[SH 365 655]
<a href="#">A01195</a>	Dinas Trefriw, (W. side). Looking NW.	Cataclastic schist. Torn lenticles of grit in chloritic phyllite. Aberffraw coast in distance.	Rhodes, J.	[SH 365 655]
<a href="#">A01196</a>	Porth Cadwaladr. Looking W. by S.	Porth Cadwaladr. Looking W. by S. Lenticular mass of quartzite in similar cataclastic schist.	Rhodes, J.	[SH 365 665]
<a href="#">A01197</a>	N. of Careg Gigfran. Looking NE.	N. of Careg Gigfran. Looking NE. Lower end of large lenticle of quartzite in cataclastic schist.	Rhodes, J.	
<a href="#">A01198</a>	N. of Careg Gigfran. Looking NE.	N. of Careg Gigfran. Looking NE. Torn lenticles of grit in chloritic phyllite.	Rhodes, J.	
<a href="#">A01199</a>	Porth Ceffylau. Looking ENE.	Porth Ceffylau. Looking ENE. Cataclastic schist. Large lenticles of quartzite above bag; a smaller one of limestone at the cliff's foot in the middle, weathered into a slight recess. Most of the other lenticles and blocks are of grit.	Rhodes, J.	

<a href="#">A01200</a>	Porth Twyn-mawr. Looking NE.	Porth Twyn-mawr. Looking NE. Cataclastic schist. Bedding survives on the right. Schist to its left full of torn fragments and grit and quartzite. Blown sand in background.	Rhodes, J.	[SH 365 655]
<a href="#">A01201</a>	NE of Glan-y-don. Looking ENE (?).	NE of Glan-y-don. Looking ENE (?). Conglomerate at base of Glantraeth Beds ('Millstone Grit') resting against ancient cliff composed of nearly vertical schists (Monian). A small fault in the schists (seen on the left) has determined the old cliff, but the NE of Glan-y-don. Looking N. Detail of the same conglomerate as in No. A1201. The	Rhodes, J.	
<a href="#">A01202</a>	NE of Glan-y-don. Looking N.	further part. Pebbly sandstone overlain by conglomerate full of pebbles of Monian grit (rounded) and phyllite (subangular). NE Bay of Llyn Maelog. Looking ENE. Basal Ordovician	Rhodes, J.	
<a href="#">A01203</a>	NE Bay of Llyn Maelog. Looking ENE.	conglomerate dipping to left. Bare dip-slope (on the other side of lake) of Monian granite and hornfels. Coast at Rhoneigr. Looking ENE. Cleavage and bedding in Arenig	Rhodes, J.	[SH 325 725]
<a href="#">A01204</a>	Coast at Rhoneigr. Looking ENE.	Black Shale, with thin hard grits. Folding pitches towards camera. Stick 1 yard long. Bag 12 inches. About 1/2 m. SW of	Rhodes, J.	[SH 315 735]
<a href="#">A01205</a>	About 1/2 m. SW of Eilian House, Tywyn Trewan. Looking N.	Eilian House, Tywyn Trewan. Looking N. Boulder of Monian granite in Arenig conglomerate.	Rhodes, J.	[SH 315 755]

<a href="#">A01206</a>	Bryn-Ilwyd, Newborough. Looking SW.	Bryn-Ilwyd, Newborough. Looking SW. Desert scenery. Great drifts of sand around bosses of pillowy lava. (Bosses 40 to 50 feet high.) S. of Cadair-y-Cythrael, Newborough. Looking	Rhodes, J.	[SH 395 645]
<a href="#">A01207</a>	S. of Cadair-y-Cythrael, Newborough. Looking NNE.	NNE. Nodular and lenticular limestone. With streaks of purple schist at the divisional planes. S. of Cerig Mawr, Newborough. Looking WNW. Great Jasper in limestone. Stick and bag at junctions of jasper in limestone. Stick in sunshine. Bag in deep shadow. Pillowy lava in background. Cerig Mawr, Newborough. Looking	Rhodes, J.	
<a href="#">A01208</a>	S. of Cerig Mawr, Newborough. Looking WNW.	E. Jasper in pillowy diabase lava. Handle of hammer against jasper. Small type of ellipsoid. NW of Cerig Mawr, Newborough. Looking	Rhodes, J.	[SH 395 645]
<a href="#">A01209</a>	Cerig Mawr, Newborough. Looking E.	NE. Pillowy diabase lava. Large type of ellipsoid.	Rhodes, J.	[SH 395 645]
<a href="#">A01210</a>	NW of Cerig Mawr, Newborough. Looking NE.	SW of Bryn-Ilwyd, Newborough. Looking NE. Pillowy diabase lava. Largest ellipsoids. (Figure for scale.) E. of Bryn-Ilwyd, Newborough. Looking NNE. Complex limestone in purple schist amid blown sand.	Rhodes, J.	[SH 395 645]
<a href="#">A01211</a>	SW of Bryn-Ilwyd, Newborough. Looking NE.	Malldraeth Marsh with lagoon in distance. Skyline of Menaian Platform beyond.	Rhodes, J.	[SH 395 645]
<a href="#">A01212</a>	E. of Bryn-Ilwyd, Newborough. Looking NNE.			

<a href="#">A01213</a>	View of Anglesey from Menai Bridge. Looking NNW.	View of Anglesey from Menai Bridge. Looking NNW. The Menaian Platform from Carnarvonshire. Top of Suspension Bridge Pier in middle of picture. The Menai Strait in middle distance but not seen. Llwydiarth Monadnock, six miles away. To right, Bodafon Monadn Menai Strait from Menai Bridge. Looking NE. The eastern reach of the Menai Strait.	Rhodes, J.	[SH 555 725]
<a href="#">A01214</a>	Menai Strait from Menai Bridge. Looking NE.	Beaumaris in the distance with open sea beyond. The eastern part of the Menaian Platform. Width of strait at this point about ? mile.	Rhodes, J.	[SH 555 725]
<a href="#">A01215</a>	Gravel-pit, 1/2 m. W. of Menai Bridge. Looking N.	Gravel-pit, 1/2 m. W. of Menai Bridge. Looking N. Glacial sands and gravels. West end of Ty'n y caean pit. (Stick one yard long.)	Rhodes, J.	[SH 545 725]
<a href="#">A01216</a>	Gravel-pit, 1/2 m. W. of Menai Bridge. Looking N.	Gravel-pit, 1/2 m. W. of Menai Bridge. Looking N. East end (of Ty'n y caean pit). Same sands and gravels of pit as No. A1215. Gravel with vertical pebbles eroding horizontal sand on right. Torllwyn and Craigwen, from Porth Pridd. Looking WNW. In Headland of Torllwyn.	Rhodes, J.	[SH 545 725]
<a href="#">A01217</a>	Torllwyn and Craigwen, from Porth Pridd. Looking WNW.	Llandeilo conglomerate and grits, with purple conglomerate to right of moorland wall. Then the same series repeated as far as brickworks, but very decomposed. To left of works,	Rhodes, J.	[SH 405 945]

<a href="#">A01218</a>	Foreshore of Torllwyn, Porth Wen. Looking E.	Foreshore of Torllwyn, Porth Wen. Looking E. Cleavage (parallel to hammer-shaft) and bedding in conglomerate and sandy shale. A little north of the purple conglomerate. Junction of coarse and fine beds shredded out along cleavage. Trwyn Bychan (see No. A1 Foreshore of W. side of Porth Wen. Looking WNW. The purple conglomerate of No. A1217. Boulder of Monian quartzite about 12 inches long in it. Cleavage nearly vertical. Thrust plane traversing conglomerate from north at lower angle. Trwyn Bychan (N. Cliff). Looking E. Bare sole of the Trwyn Bychan thrust plane in foreground. Vertical cliff on Monian Schistose tuff with highly inclined foliation planes resting on the thrust plane. Foot of Ogo Gynfor, Cliff. Looking ESE. Llandeilo conglomerate resting unconformably upon Monian (‘Llanbydrig’) quartzite and containing boulders of them.	Rhodes, J.	[SH 405 945]
<a href="#">A01219</a>	Foreshore of W. side of Porth Wen. Looking WNW.	A1217. Boulder of Monian quartzite about 12 inches long in it. Cleavage nearly vertical. Thrust plane traversing conglomerate from north at lower angle. Trwyn Bychan (N. Cliff). Looking E. Bare sole of the Trwyn Bychan thrust plane in foreground. Vertical cliff on Monian Schistose tuff with highly inclined foliation planes resting on the thrust plane. Foot of Ogo Gynfor, Cliff. Looking ESE. Llandeilo conglomerate resting unconformably upon Monian (‘Llanbydrig’) quartzite and containing boulders of them.	Rhodes, J.	[SH 405 945]
<a href="#">A01220</a>	Trwyn Bychan (N. Cliff). Looking E.	Foot of Ogo Gynfor, Cliff. Looking ESE. Llandeilo conglomerate resting unconformably upon Monian (‘Llanbydrig’) quartzite and containing boulders of them.	Rhodes, J.	[SH 405 945]
<a href="#">A01221</a>	Foot of Ogo Gynfor, Cliff. Looking ESE.	Cemlyn Bay Lagoon. Looking NE. Cemlyn Lagoon, behind great shingle-ridge. Porth-y-Ebol. Looking ENE. The Carmel Head thrust plane. Monian chloritic phyllites resting upon cleaved Ordovician Shales.	Rhodes, J.	[SH 335 925]
<a href="#">A01222</a>	Cemlyn Bay Lagoon. Looking NE.	Porth-y-Ebol. Looking ENE. The Carmel Head thrust plane. Monian chloritic phyllites resting upon cleaved Ordovician Shales.	Rhodes, J.	[SH 355 945]
<a href="#">A01223</a>	Porth-y-Ebol. Looking ENE.			

		Cove S. of Porth-y-Wig, Carmel Head. Looking W. Another view of No.		
<a href="#">A01225</a>	Cove S. of Porth-y-Wig, Carmel Head. Looking W.	A1224. [Permian Middle marl. Shows marl with beds of soft, very marly sandstone. The whole resembles a section of Keuper Waterstones.]	Rhodes, J.	[SH 295 925]
<a href="#">A01226</a>	Cove E. of Porth-y-Wig, Carmel Head. Looking ENE.	Cove E. of Porth-y-Wig, Carmel Head. Looking ENE. Masses of quartzite and limestone in Monian phyllitic schist. The light masses in front are limestone, the further ones quartzite (with some smaller limestones).	Rhodes, J.	[SH 295 925]
<a href="#">A01227</a>	Porth Ddyfn, Carmel Head. Looking NNW.	Porth Ddyfn, Carmel Head. Looking NNW. Ordovician Shale with double cleavage.	Rhodes, J.	[SH 295 925]
<a href="#">A01228</a>	N. of Ogo Arian, Carmel Head. Looking E.	N. of Ogo Arian, Carmel Head. Looking E. Micaceous gneiss with granitoid seams.	Rhodes, J.	[SH 295 925]
<a href="#">A01229</a>	N. of Ogo Arian, Carmel Head. Looking NE.	N. of Ogo Arian, Carmel Head. Looking NE. Foliated granite with inclusions of gneiss.	Rhodes, J.	[SH 295 925]
<a href="#">A01230</a>	Cliff, N. of Porth Faur Llwynog, Carmel Head. Looking ENE.	Cliff, N. of Porth Faur Llwynog, Carmel Head. Looking ENE. Lenticular granite bands in gneiss.	Rhodes, J.	[SH 295 925]
<a href="#">A01231</a>	Porth-y-Hwch-Fach. Looking ENE.	Porth-y-Hwch-Fach. Looking ENE. Thrust plane on left, driving foliated granite over Ordovician shale and grit.	Rhodes, J.	
<a href="#">A01232</a>	Porth-y-Hwch-Fach. Looking ENE.	Porth-y-Hwch-Fach. Looking ENE. Thrust plane in cove driving Fydlyn Beds on to Ginia Beds.	Rhodes, J.	

<a href="#">A01233</a>	Mynydd-y-Garn, from Rhosgoch. Looking WNW.	Mynydd-y-Garn, from Rhosgoch. Looking WNW. The 'Monadnock' of Mynydd-y-Garn (about 550 ft.) in the distance. To its right, Pen Bryn yr Eglwyn near Carmel Head. Nearer, to the left, rising ground of the Barrier. Between it and the viewpoint, we look across	Rhodes, J.	[SH 405 895]
<a href="#">A01234</a>	Pant-y-Cola, from Rhosgoch. Looking ENE.	Pant-y-Cola, from Rhosgoch. Looking ENE. Escarpment and bare sole of the Carmel Head Thrust plane. Mynydd Mechell schists thrust at low-angle on Ordovician Shales. Gwaen-y-dog, from Llanol. Looking WNW. The same as No. A1234. Thrust plane almost horizontal.	Rhodes, J.	[SH 405 895]
<a href="#">A01235</a>	Gwaen-y-dog, from Llanol. Looking WNW.	[Escarpment and bare sole of the Carmel Head thrust plane. Mynydd Mechell schists thrust at low-angle on Ordovician Shales.]	Rhodes, J.	[SH 375 885]
<a href="#">A01236</a>	Gareg Fawr. Looking N.	Gareg Fawr. Looking N. Brecciation on the sole of the Carmel Head Thrust plane. Just below escarpment at the left of the last view, but not in sight. Plane horizontal. Schists (light) and Shales (dark) interfaulted on left. Confused breccia at foot. Block E. end of West Pit, Parys Mountain.	Rhodes, J.	[SH 365 885]
<a href="#">A01237</a>	E. end of West Pit, Parys Mountain. Looking NE.	Looking NE. Fold in silicified Silurian shale. Silicified felsite behind and above. Boulder clay on top to left. Mine debris on skyline.	Rhodes, J.	[SH 445 905]

<a href="#">A01238</a>	S. side of West Pit, Parys Mountain. Looking SE.	S. side of West Pit, Parys Mountain. Looking SE. Boulder clay resting on shale. Mine debris above. The hard bands are 'Gossan', which is ferrified boulder clay.	Rhodes, J.	[SH 445 905]
<a href="#">A01239</a>	W. side of East Pit, Parys Mountain. Looking W.	W. side of East Pit, Parys Mountain. Looking W. Strike-vein of pyrites (light) cutting silicified shale. Two 'cross-courses' of pyrites near bottom. Many small quartz-veins.	Rhodes, J.	[SH 445 905]
<a href="#">A01240</a>	East Pit, Parys Mountain. Looking ENE.	East Pit, Parys Mountain. Looking ENE. Crag of silicified shale, hard and massive-looking. Surviving cleavage seen on left, at lower angle than bedding.	Rhodes, J.	[SH 445 905]
<a href="#">A01241</a>	East Pit, Parys Mountain. Looking ENE.	East Pit, Parys Mountain. Looking ENE. Just left of No. A1240. Silicification obliterating cleavage in Silurian shale. Cleavage survives in upper part. Massive silicified parts below and to right, and in them, old cleavage planes filled with thin quartz-p	Rhodes, J.	[SH 445 905]
<a href="#">A01242</a>	West Pit, Parys Mountain. Looking NE.	West Pit, Parys Mountain. Looking NE. Silicified felsite on left; silicified shale on right. Engine-house chimney stands on a crag of silicified shale in bottom. (Subject of No. A1237 at end of pit.) Boulder clay from the right of windmill nearly to left	Rhodes, J.	[SH 445 905]

<a href="#">A01243</a>	Coast at Amlwch, Traeth Dynion. Looking NNE.	Coast at Amlwch, Traeth Dynion. Looking between bedded jaspers. Stick standing across diabase. Bag at its top.	Rhodes, J.	[SH 445 935]
<a href="#">A01244</a>	Coast of Amlwch, E. side of Porth Offeiriad. Looking NNE.	Coast of Amlwch, E. side of Porth Offeiriad. Looking NNE. Hard and soft bands in schistose grits. Foliation sometimes oblique to bedding.	Rhodes, J.	[SH 445 935]
<a href="#">A01245</a>	Amlwch Port (W. side). Looking NNW.	Amlwch Port (W. side). Looking NNW. Schistose grits. Foliation oblique to bedding. Shredding of beds along foliation.	Rhodes, J.	[SH 445 935]
<a href="#">A01246</a>	Amlwch Port (E of village). Looking ENE.	Amlwch Port (E of village). Looking ENE. Rapid folding in Amlwch Schists. Axis vertical.	Rhodes, J.	[SH 455 935]
<a href="#">A01247</a>	Amlwch Port, (by the Pool), E. of village. Looking E.	Amlwch Port, (by the Pool), E. of village. Looking E. Rapid folding in bedded jaspers and purple phyllites.	Rhodes, J.	[SH 455 935]
<a href="#">A01248</a>	Sea cliffs W. of Aber Cawell. Looking WNW.	Sea cliffs W. of Aber Cawell. Looking WNW. Ice-moulded cliffs of northern coast.	Rhodes, J.	
<a href="#">A01249</a>	The Moor, E. of Amylwch Port, (from near 'The Pool'). Looking ENE.	The Moor, E. of Amylwch Port, (from near 'The Pool'). Looking ENE. Characteristic bossy scenery. (Amlwch Schists.) Point Lynas with lighthouse in the distance.	Rhodes, J.	[SH 455 935]
<a href="#">A01250</a>	Boulder of W. Cliff of Porth Eilian. Looking ESE.	Boulder of W. Cliff of Porth Eilian. Looking ESE. Boulder of Galloway Granite.	Rhodes, J.	[SH 475 935]
<a href="#">A01251</a>	Eastern side of Porth Eilian. (From boat.) Looking E.	Eastern side of Porth Eilian. (From boat.) Looking E. Folding at Amlwch Schists.	Rhodes, J.	[SH 475 935]

<a href="#">A01252</a>	Eastern side of Porth Wnol. Looking N.	Eastern side of Porth Wnol. Looking N. Great cataclastic lenticles of quartzite in rudely schistose breccia. Late dolerite dyke (probably Tertiary) in gap on right. Cliff, Trwyn-y-Parc, Cemaes Bay. Looking ESE. Typical 'crush conglomerate'. Lumps of grey grit in matrix of broken grit and phyllite.	Rhodes, J.	[SH 355 945]
<a href="#">A01253</a>	Cliff, Trwyn-y-Parc, Cemaes Bay. Looking ESE.	Cliff, Trwyn-y-Parc, Cemaes Bay. Looking ESE. Typical 'crush conglomerate'. Lumps of grey grit in matrix of broken grit and phyllite.	Rhodes, J.	[SH 365 935]
<a href="#">A01254</a>	Cliff, Trwyn-y-Parc, Cemaes Bay. Looking NNE.	Cliff, Trwyn-y-Parc, Cemaes Bay. Looking NNE. Typical 'crush conglomerate'. Left side of same cliff (No. A1253). S. side of Porth-y-mor. Looking W. Alternating cornstones and sandstones.	Rhodes, J.	[SH 365 935]
<a href="#">A01255</a>	S. side of Porth-y-mor. Looking W.	Sandstones thin-bedded. Cleavage visible in upper cornstones.	Rhodes, J.	[SH 495 885]
<a href="#">A01256</a>	S. side of Porth-y-mor. Looking SE.	S. side of Porth-y-mor. Looking SE. Alternating red sandstones, and grey nodular cornstones in lower part. Thick cornstones at top with cleavage seen obliquely. Boulder clay under grass.	Rhodes, J.	[SH 495 885]
<a href="#">A01257</a>	Coast between Porth-y-mor and Lligwy Bay. Looking E.	Coast between Porth-y-mor and Lligwy Bay. Looking E. Sandstone to right. Thick (light) cornstone in middle. Beds vertical. Cleavage nearly horizontal. Stick parallel to cleavage. Carboniferous Limestone of Moelfre Point in distance.	Rhodes, J.	[SH 495 885]

<a href="#">A01258</a>	S. side of Lligwy Bay. Looking SE.	S. side of Lligwy Bay. Looking SE. The Lligwy Bay Conglomerate (Carboniferous). Pebbly sandstones above it. Stick resting on boulder of Parys Mountain Silicified Shale. Boulder about 15 inches long, to left of stick, is of Ordovician conglomerate.	Rhodes, J.	[SH 505 875]
<a href="#">A01259</a>	Foreshore, S. side of Lligwy Bay. Looking NE.	Foreshore, S. side of Lligwy Bay. Looking NE. Contemporaneous erosion in Carboniferous Limestone. Conglomerate in crevices, and lumps of limestone in conglomerate.	Rhodes, J.	[SH 505 875]
<a href="#">A01260</a>	Careg Ddafad, Lligwy Bay. Looking S.	Careg Ddafad, Lligwy Bay. Looking S. Vertical beds at the contemporaneous disturbance at the base of the Carboniferous Limestone. Limestone conglomerate on the left.	Rhodes, J.	[SH 505 875]
<a href="#">A01261</a>	Cliffs from foot of S. side of South Stack. Looking ENE.	Cliffs from foot of S. side of South Stack. Looking ENE. The great folds of the South Stack Series. Axes nearly vertical. Minor folds visible in softer beds, axes inclined to north-west. Vertical foliation in harder beds.	Rhodes, J.	[SH 205 825]
<a href="#">A01262</a>	Cliffs from W. end of Bridge, South Stack. Looking ENE.	Cliffs from W. end of Bridge, South Stack. Looking ENE. Detail of large fold. Corrugation in softer beds, vertical foliation in harder. Face of cliff 50 feet back from grass, across a sea-chasm 70 feet deep.	Rhodes, J.	[SH 205 825]

<a href="#">A01263</a>	Cliff from N. side of South Stack. Looking ENE.	Cliff from N. side of South Stack. Looking ENE. Folding in the South Stack Series. North of the Bridge. Cliffs of the quartzite in the background.	Rhodes, J.	[SH 205 825]
<a href="#">A01264</a>	Cliff structures from end of South Stack, from Signal Station. Looking ENE.	Cliff structures from end of South Stack, from Signal Station. Looking ENE. Bedding and foliation on the South Stack. North limb of anticline.	Rhodes, J.	[SH 205 825]
<a href="#">A01265</a>	Coast, New Harbour, Holyhead. Looking ENE.	Coast, New Harbour, Holyhead. Looking ENE. Typical folding in Harbour Schists. No perceptible displacement along cracks.	Rhodes, J.	[SH 245 835]
<a href="#">A01266</a>	Coast NE of Admiralty House, Salt Island, Holyhead. Looking ENE.	Coast NE of Admiralty House, Salt Island, Holyhead. Looking ENE. Folding and slipping in Harbour Schists.	Rhodes, J.	[SH 255 835]
<a href="#">A01267</a>	Breakwater Rocks, Holyhead. Looking ENE.	Breakwater Rocks, Holyhead. Looking ENE. Typical folding in Harbour Schists.	Rhodes, J.	[SH 235 835]
<a href="#">A01268</a>	Breakwater Rocks, Holyhead. Looking ENE.	Breakwater Rocks, Holyhead. Looking ENE. Rapid folding in Harbour Schists. Being right-hand part of No. A1267, enlarged. Sharp unbroken folding.	Rhodes, J.	[SH 235 835]
<a href="#">A01269</a>	Cliff at Porth Morgan, Porth Defarch. Looking NE.	Cliff at Porth Morgan, Porth Defarch. Looking NE. Overfolding in South Stack Series. Beds remaining vertical. Cross foliation.	Rhodes, J.	[SH 235 795]

<a href="#">A01270</a>	Penial Hill, Llanfwrog. Looking NW.	Penial Hill, Llanfwrog. Looking NW. Penial Drumlin. Cliff at its left end all boulder clay, resting on platform of rock at sea-level. Typical drumlin seen at right- angles to major axis. Low sand-dunes in foreground. Cliff 50 feet high.	Rhodes, J.	[SH 305 845]
<a href="#">A01271</a>	Clegyr Mawr, Gwalchmai. Looking NNW.	Clegyr Mawr, Gwalchmai. Looking NNW. Band of foliated granite in hornblende gneiss.	Rhodes, J.	[SH 375 775]
<a href="#">A01272</a>	Clegyr Mawr, Gwalchmai. Looking NE.	Clegyr Mawr, Gwalchmai. Looking NE. Granitoid knots in hornblende gneiss. Foliation of gneiss dipping away from camera. Thin light bands of gneiss sharply folded.	Rhodes, J.	[SH 375 775]
<a href="#">A01273</a>	Clegyr Mawr, Gwalchmai. Looking NE.	Clegyr Mawr, Gwalchmai. Looking NE. Well-foliated hornblende gneiss with acid lenticles.	Rhodes, J.	[SH 375 775]
<a href="#">A01274</a>	Clegyr Mawr, Gwalchmai. Looking ENE.	Clegyr Mawr, Gwalchmai. Looking ENE. Same section. Hornblende gneiss with coarse acid bands and veins and unfoliated basic knots. One of these to left of hammer. Light part at top merely weathered joint-plane.	Rhodes, J.	[SH 375 775]
<a href="#">A01275</a>	Clegyr Mawr, Gwalchmai. Looking NNE.	Clegyr Mawr, Gwalchmai. Looking NNE. Same section. Detail a few yards to left of A1274. Hornblende gneiss. Hammer 12? inches.	Rhodes, J.	[SH 375 775]
<a href="#">A01276</a>	Clegyr Mawr, Gwalchmai. Looking SE.	Clegyr Mawr, Gwalchmai. Looking SE. Ice-worn boss of hornblende gneiss, (20 to 30 feet high).	Rhodes, J.	[SH 375 775]

<a href="#">A01277</a>	Craig Allor, Gwalchmai. Looking NE.	Craig Allor, Gwalchmai. Looking NE. Scenery of the hornblende gneiss. Bodanon Monadnock, 8 Rhodes, J. miles away, to left of high boss. Bosses 40 to 50 feet high.		[SH 385 765]
<a href="#">A01278</a>	S. side of Holyhead Road, 1/2 m. SW of Craig Allor. Looking ENE.	S. side of Holyhead Road, 1/2 m. SW of Craig Allor. Looking ENE. Granite sill on foliated mica hornfels. Hammer 12? inches. Coast at Graig Llwyd, Holyhead. Looking NE. Similar to A1278. [Granite sill on foliated mica hornfels.] Folds pitching away from observer. Cross foliation well marked. Boulder of Porth Defarch dolerite in foreground. Cliff of Clybyddiad, Holyhead. Looking ENE. Similar to A1278. [Granite sill on foliated mica hornfels.] Massive bed almost unfolded, thin beds close to it corrugated. Cross-foliation moderate. Holyhead Mountain from near Dinas. Looking NNW.	Rhodes, J.	[SH 375 765]
<a href="#">A01279</a>	Coast at Graig Llwyd, Holyhead. Looking NE.		Rhodes, J.	
<a href="#">A01280</a>	Cliff of Clybyddiad, Holyhead. Looking ENE.		Rhodes, J.	
<a href="#">A01281</a>	Holyhead Mountain from near Dinas. Looking NNW.	Holyhead Mountain (monadnock). South Stack Moor to left of summit, with the two small outliers of quartzite. Ellens' Tower on Cliffs' Brow at extreme left. Long Creek, SE of Pen-Rhyn-Mawr, Holyhead. Looking NNW. Isoclinal folds pitching to right. Holyhead Mountain in distance.	Rhodes, J.	[SH 215 825]
<a href="#">A01282</a>	Long Creek, SE of Pen-Rhyn-Mawr, Holyhead. Looking NNW.		Rhodes, J.	[SH 215 795]

<a href="#">A01283</a>	Creek SE of Pen-Las Rock, from across Bay, Gors-goch, Holyhead. Looking NNW.	Creek SE of Pen-Las Rock, from across Bay, Gors-goch, Holyhead. Looking NNW. The Henborth Dyke. Penlas Rock and South Stack to left of dyke. Height of cliff at dyke about 200 feet. (scale). Cliff W. of Porth-y-Graig,	Rhodes, J.	[SH 205 815]
